

Fostering Trust and Transparency in Governance:
Investigating and Addressing the Requirements for Building Integrity
in Public Sector Information System in the ICT Environment

Monthly Briefing Note June 2007

Case Study Findings - Video Conference

The video conference was intended to give key stakeholders from the case study countries an opportunity to exchange views and experiences of manual and electronic human resources and payroll systems. It took place on 13 June. The Conference successfully linked senior government officials in Accra, Dar Es Salaam and Lusaka with DFID and World Bank staff as well as project team members in Washington, London and Freetown. Key issues arising from the case studies and next steps in the development of the training materials were discussed by participants in each country. The outcomes will be considered during preparation of the project's deliverables.

Educators Forum

This has been set 16 to 20 July at the University of Botswana. Various educators have confirmed their participation, logistical arrangements have been finalised and preparation of background material has commenced.
